# 1 Introduction

## 1.1 Structure of the cultural heritage appendices

1.1.1 The cultural heritage appendices for the Birmingham Interchange and Chelmsley Wood area (CFA24) comprise::

- baseline reports (Volume 5: Appendix CH-001-024);
- a gazetteer of heritage assets (this appendix);
- impact assessment (Volume 5: Appendix CH-003-024); and
- survey reports (Volume 5: Appendix CH-004-024).

1.1.1 Maps referred to throughout the cultural heritage appendices are contained in the Volume 5 cultural heritage map book.

## 1.2 Scope and coverage

1.2.1 This appendix provides descriptive information for the Birmingham Interchange and Chelmsley Wood area CFA24 relating to identified designated and non-designated heritage assets that lie within the following study areas:

- designated assets: All designated assets within 2km of the centre line of the Proposed Scheme are listed. Detailed descriptions of assets and their settings are provided only for those designated assets where field study has determined a potential for impacts on setting or significance to arise; and
- non-designated assets: Detailed descriptions of all assets and their settings are provided for those assets located within the land required to construct the Proposed Scheme and within the 250m buffer zone.

1.2.2 Where appropriate, assets have been grouped together to assist in an understanding either of their context e.g. collecting together archaeological intervention s that relate to a common location or of their setting and significance e.g. collecting together historic buildings either within specific conservation areas or within the same streetscape context.

# 2 Information supplied

2.1.1 For each asset or group of assets the following information has been provided:

- unique identifier: e.g. BIC001;
- map reference: the gazetteer should be viewed alongside its associated map series (Maps CH-01-154 - CH-01-155a, CH-02-153, Volume 5, Map Book cultural heritage). The map reference comprises the map sheet series, such as 'CH-01-154', and a location

reference within the map, such as 'E4' within the sheet;

- asset type: simple classification of asset type using following classes:
  - ancient woodland;
  - archaeology;
  - built heritage;
  - historic hedgerow;
  - historic landscape; and
  - settlement.
- name: either name used in designation record(s) or other identifiable name;
- description: short description of the asset and, where relevant, its setting;
- period: primary period relating to asset using period classifications from Volume 5: Appendix CH-001-024;
- designation: if applicable, key designation or designations for some groups;
- grade: where applicable, grade of any designated assets;
- significance / value: score based on Scope and Methodology Report classifications i.e. high, moderate, low, not significant; an 'unknown' category has been introduced in respect of Light Detection and Ranging (LiDAR) and aerial photographic investigation (API) features, in instances where there is presently insufficient evidence to determine significance;
- National Heritage List (NHL) reference: NHL reference for designated assets, where relevant; and
- Historic Environment Record (HER) reference: HER reference, where relevant.

## Gazetteer

Table 1: Gazetteer of heritage assets for CFA24

Unique identifier	Map reference	Asset type	Name	Description	Period	Designation	Grade	Significance / value	NHL ref	HER ref
BIC001	CH-02-152,F3 CH-02-153,I3	Woodland	The Somers	Ancient replanted woodland. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and the quarrying a reinstatement of land in the 20th century, including the creation of the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Medieval to post-medieval	Ancient woodland	N/A	High	N/A	N/A
BIC002	CH-02-153, I2	Built heritage	Cottage, Birmingham Road	Late 16th century cottage with 19th century addition on north-west. Timber-framed and colour-washed underbuilding, plain-tiled roof with end stack. The setting of The cottage has been eroded by the sports club and the busy A45 Coventry Road dual carriageway to the north.	Post-medieval	Listed building	II	Moderate	1319906	N/A
BIC003	CH-01-154, G2	Historic landscape	Packington Hall park	Early 17th century park remodelled in the mid-18th century after a scheme by Lancelot Brown, with late 18th century and early 19th century picturesque elements. The setting of this park is the wider surrounding landscape which once formed the large Packington estate however this has been diminished by the appearance of the Little Packington landfill and the development of the National Exhibition Centre (NEC) and Birmingham Airport to the west. The setting has therefore been reduced to the boundary of the park and the ornamental features within it which are all well preserved forming a legible landscape. The significance of the asset lies in its historic, aesthetic and architectural value with associations with Lancelot Brown and the survival of many original features. The asset provides information into landscape design in the 17th and 18th centuries and changing fashions. The asset also has historical value in providing a preserved estate with earlier elements within it. The remaining standing features within the park also hold architectural value and many are statutorily listed.	Post-medieval	Registered park and garden	II*	High	1001193	N/A
BIC004	CH-01-154,E3	Archaeology	Moat, medieval fields, possible moat feeder or drainage system	Feature identified through aerial photography interpretation. Eroded ridge and furrow, and a deep straight ditch, extant in 1946 but only slight earthworks recorded on current photographs. The significance of this asset lies in its archaeological evidential and historic value. The wider surrounding landscape of Warwickshire contains a number of moats and this example adds information on construction techniques, the social hierarchy of this area during the medieval period and the utilisation of land. Environmental evidence may survive in any waterlogged areas of the former moat which give evidential value and can provide information on the diet and agricultural regime of the surrounding landscape. The moat has historical value in the addition to the historical narrative of the area.	Medieval to Post-medieval	Non-designated	N/A	Low	N/A	N/A

BIC005	CH-01-154, J4	Archaeology	Ridge and furrow	Ridge and furrow between Diddington Hall and Geary's Heath, Great Packington. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval to 20th century	Non-designated	N/A	Low	N/A	MSI1343
BIC006	CH-02-152, E2 CH-02-153, H2	Built heritage	Memorial, approximately 850m south-east of Packington Hall	Memorial added to Packington Park in the 18th century. Coursed and squared sandstone pier on sandstone plinth with tablet inscribed in Roman lettering, partly eroded. The tablet records a death by lightning in that place and date, on one side a stone carved with crossed bolts of lightning. The setting of the memorial is location specific within the park.	Post-medieval	Listed building	II	Moderate	1365122	N/A
BIC007	CH-02-152, E3 CH-02-153, H3	Built heritage	Lodges, gatepiers and gates at southern entrance to Packington Park	Late 18th century lodges of brick, stuccoed, single storey with low pitch pyramidal roof of slate with ball-finial and moulded stone cornice. Wrought-iron gates added in 1935. The lodge presents a public face to the Packington Estate, highlighting the importance of the estate through its architecture. Its setting is location specific, forming part of the wider estate and the access point on which it is situated.	Post-medieval	Listed building	II	Moderate	1034850	N/A
BIC008	CH-01-154, J4	Archaeology	Moat	Wide ditch measuring 56m overall and square in plan, surrounding site of building, survives as earthwork, 300m north-east of Diddington Farm, Great Packington. The significance of this asset lies in its archaeological evidential and historic value. The study area contains a number of moats and this example adds information on construction techniques, the social hierarchy of this area during the medieval period and the utilisation of land. Environmental evidence may survive in any waterlogged areas of the former moat which give evidential value and can provide information on the diet and agricultural regime of the surrounding landscape. The moat has historical value in the addition to the historical narrative of the area and the further evidence it could provide for why this area was such a draw for the constructors of moats in the medieval period.	Medieval	Non-designated	N/A	Low	N/A	MWA412
BIC009	CH-02-152, E2 CH-02-153, H2	Built heritage	Beechwood Lodge at south-east entrance to Packington Park, approximately 570m south-east of Packington Hall	Lodge built in the late 18th century, of buff sandstone ashlar on brick plinth with rendered rear wall, pyramidal roof of slate with eaves cornice of moulded stone and square in plan. The lodge presents a public face to the Packington Estate, highlighting the importance of the estate through its architecture. The setting of the lodge is location specific, marking an entrance to the park and forming part of the wider estate.	Post-medieval	Listed building	II	Moderate	1365121	N/A
BIC010	CH-02-152, E2 CH-02-153, H2	Built heritage	Lodge on right hand side of south-eastern entrance to Packington Park, approximately 570m south-east of Packington Hall	Late 18th century lodge of buff sandstone ashlar on brick plinth with rendered rear wall, pyramidal roof of slate with eaves cornice of moulded stone and square in plan. The lodge presents a public face to the Packington Estate, highlighting the importance of the estate through its architecture. Its setting is location specific, forming part of the wider estate and the access point on which it is situated.	Post-medieval	Listed building	II	Moderate	1034810	N/A
BIC011	CH-02-152, E3 CH-02-153, H3	Built heritage	Kennel House, approx. 600m south of Packington Hall	The kennels were added in the mid-18th century in red brick with a symmetrical south façade. The building is in residential use and set apart from the main parkland, within Little Dayhouse Wood.	Post-medieval	Listed building	II	Moderate	1034849	N/A

BICo12	CH-01-154, J3	Archaeology	Ridge and furrow	North-west of Geary's Heath, Great Packington. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval to 20th century	Non-designated	N/A	Low	N/A	MSI1344
BICo13	CH-02-152, E2 CH-02-153, H2	Built heritage	Grotto, approximately 450m south-east of Packington Hall	Mid-18th century grotto with coursed sandstone opening to brick lined tunnel leading from Great Pool. The opening has rusticated stone retaining wall to one side. The grotto was designed by Lancelot Brown when he landscaped the gardens in the mid-18th century. The structure makes a positive contribution to the wider parkland and adds to the significance of the group of structures associated with the hall.	Post-medieval	Listed building	II	Moderate	1034809	N/A
BICo14	CH-02-152, E2 CH-02-153, H3	Built heritage	Bridge approximately 300m south-east of Packington Hall	Mid-18th century bridge of dressed and coursed sandstone with round-headed arch of double span and low parapet wall designed by Lancelot Brown when he landscaped the garden in the mid-18th century. The structure makes a positive contribution to the wider parkland and adds to the significance of the group of structures associated with the hall.	Post-medieval	Listed building	II	Moderate	1034848	N/A
BICo15	CH-02-152, E2 CH-02-153, H2	Built heritage	Spring Head, approx. 400m south-east of Packington Hall	Mid-18th century spring head of coursed sandstone, round headed moulded arch to opening with pedimented roof, foliate paterae to spandrels. Designed by Lancelot Brown in the mid-18th century, when he landscaped the gardens. The structure makes a positive contribution to the wider parkland and adds to the significance of the group of structures associated with the hall.	Post-medieval	Listed building	II	Moderate	1034808	N/A
BICo16	CH-02-152 D2 CH-02-153 H3	Built heritage	Footbridge over weir, 150m south-east of Packington Hall	Mid-19th century footbridge of wrought-iron with rusticated sandstone piers at ends. Single span segmental arch with wrought-iron parapet. The structure makes a positive contribution to the wider parkland and adds to the significance of the group of structures associated with the hall.	Post-medieval	Listed building	II	Moderate	1116408	N/A
BICo17	CH-01-154, G1	Archaeology	Packington Hall and gardens building foundations	Feature identified through aerial photography interpretation. Building foundations on south side of Packington Hall, with buried ridge and furrow. The significance of this asset lies in its historical, archaeological and evidential value. It provides information on the earlier buildings within the park and possible different construction techniques and functions. The asset also has evidential value in the knowledge it provides of how the estate evolved over time and may reveal earlier garden features. The asset also has historical value in the evidence it can provide of the Packington Estate itself, the land use and social structure of the medieval and post-medieval period.	Medieval to Post-medieval	Non-designated	N/A	Moderate	N/A	N/A
BICo18	CH-01-154, G2	Archaeology	Deer park	Packington Park, site of deer park, north-east of Packington Hall, imparked in reign of James I (1603-1625), designed by Lancelot 'Capability' Brown, 1751, pleasure grounds developed late 18th century by 4th Earl of Aylesford, now forms part of the Packington Estate. The setting of this asset is the registered park boundary of the estate. The significance lies in its historic value as evidence of the changing designed landscape in this area and as an example of land utilisation in the post-medieval period. It also provides evidence for the changing fashion in recreational activity for the landed gentry throughout the post-medieval period.	Post-medieval to 20th century	Non-designated	N/A	Moderate	N/A	MWA410

BICo19	CH-01-154, H3 CH-02-153, H4 CH-02-152, D4	Built heritage	Mill Farmhouse	Early 18th century farmhouse of red brick on an L-plan extending over two storeys and attic. The farmhouse is orientated to the south, with views towards the A45 Coventry Road. To the rear of the property is a courtyard of former outbuildings, now converted to commercial units.	Post-medieval	Listed building	II	Moderate	1034843	N/A
BICo20	CH-02-152, D2 CH-02-153, H3	Built heritage	Gates, gatepiers, railings and wall adjoining Packington Hall on the south-east	Gatepiers added in the mid-18th century. Buff sandstone ashlar, rusticated gatepiers with fret pattern and swagged frieze and depressed pyramidal top. Asset includes wrought-iron gates with spiked standards, similar standards to railings on dwarf ashlar wall. The gatepiers form a group with the hall and ancillary structures, contributing to the wider setting and significance of the park.	Post-medieval	Listed building	II	Moderate	1116426	N/A
BICo21	CH-02-152, D2 CH-02-153, H3	Built heritage	Packington Hall	Mansion house, late 17th century origin, remodelled in 1766 by Matthew Brettingham for 3rd Earl of Aylesford, centre part of roof rebuilt c.1980 following fire in 1979 which damaged attic storey and parts of the lower storeys,. The hall is of classical design with symmetrical façade to the east arranged around a central portico. Its ashlar construction stands out from the surrounding parkland and links the hall to the neighbouring service buildings which continue to the north. The Packington Estate represents a comprehensive group of buildings which reflect the prolonged historic development of the surrounding parkland. The setting of the structures is defined by their relationship to the park and each other, with their significance increased by their contribution to the wider estate.	Post-medieval	Listed building	II*	High	1116473	N/A
BICo22	CH-02-152, D2 CH-02-153, H3	Built heritage	Garden terrace to the west and south of Packington Hall	Garden terrace added in the mid-19th century, by Henry Hakewill. Red sandstone ashlar with grey sandstone to upper courses, flights of steps with turned balusters and moulded stone coping. The terrace forms a group with the hall and makes a positive contribution to its setting.	Post-medieval	Listed building	II	Moderate	1034846	N/A
BICo23	CH-02-152, D2 CH-02-153, H3	Built heritage	Stable block at Packington Hall	Stable block added in the mid-18th century by William or David Horne for the 3rd Earl of Aylesford. Buff sandstone ashlar to front range and stucco to rear with low pitch slate roof with pyramidal roofs to corner towers. On a courtyard plan with square corner towers. Now in use as an office. The east frontage follows the classical architecture of the main house with central entrance portico. The Packington Estate represents a comprehensive group of buildings which reflect the prolonged historic development of the surrounding parkland. The setting of the structures is defined by their relationship to the park and each other, with their significance increased by their contribution to the wider estate.	Post-medieval	Listed building	II	Moderate	1034845	N/A
BICo24	CH-02-152, D2 CH-02-153, G3	Built heritage	Gatepier to right hand of entry to stable yard, north of stable block at Packington Hall	Late 18th century, rusticated gatepier with band of fret pattern, swagged frieze and depressed pyramidal top, possibly by Matthew Brettingham. The gatepiers form a group with the stable block.	Post-medieval	Listed building	II	Moderate	1116434	N/A
BICo25	CH-02-152, D2 CH-02-153, G3	Built heritage	Gatepier to left hand of entry of yard stable, north of stable block at Packington Hall	Late 18th century, rusticated gatepier with band of fret pattern, swagged frieze and depressed pyramidal top, possibly by Matthew Brettingham. The gatepiers form a group with the stable block.	Post-medieval	Listed building	II	Moderate	1034847	N/A

BICo26	CH-01-154, H7	Built heritage	Arden Brickworks	Arden Brickworks, Bickenhill. Some structures remains extant but the site is now in use by a demolition crew and in a poor condition.	Post-medieval to 20th century	Non-designated	N/A	Low	N/A	MSI9302
BICo27	CH-01-154, H2	Archaeology	Watermill	Site of Packington Mill, Great Packington, to the west of Packington Hall on the River Blythe, mentioned in the 13th, 16th and 17th centuries. The significance of the asset lies in its archaeological, evidential and historic value. It provides evidence on early industry in the study area and early industrial technology. It has historic value in the information it can add to the narrative of the historical development of the study area and with its association with the Packington Estate.	Medieval to Post-medieval	Non-designated	N/A	Low	N/A	MWA413
BICo28	CH-02-152, D2 CH-02-153, G3	Built heritage	Kitchen garden wall, approx. 300m north of Packington Hall	Late 18th century, red brick, English and English garden wall bond with shaped coping, in south side a doorway with moulded sandstone surround. The wall provides evidence for the former layout of the park which incorporated both functional and aesthetic elements. Its significance is linked to its parkland setting and association with the hall.	Post-medieval	Listed building	II	Moderate	1116420	N/A
BICo29	CH-02-152, D2 CH-02-153, G3	Built heritage	Bentons Lodge, approximately 350m north-west of Packington Hall	Lodge dating to the late 18th century. Red brick with hipped, slate roof. The lodge presents a public face to the Packington Estate, highlighting the importance of the estate through its architecture. Its setting is location specific, forming part of the wider estate and the access point on which it is situated.	Post-medieval	Listed building	II	Moderate	1116415	N/A
BICo30	CH-01-154, G6	Archaeology	Former Stonebridge Railway	Site of Stonebridge Railway, once the Hampton Branch of the Birmingham and Derby Junction Railway, but of little importance after 1842. Passenger service withdrawn 1917, freight withdrawn 1930, line closed 1939, track lifted 1952. The significance of this asset lies in its evidential value in the story of the developing transport networks in this region. It also has historic value in the association with George Stephenson, the surveyor for the railway and was an early addition to the railway system in Birmingham.	Post-medieval to 20th century	Non-designated	N/A	Low	N/A	MWA427
BICo31	CH-01-154, F8	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of this asset lies in its archaeological value and evidence it provides relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BICo32	CH-01-154, H8	Settlement	Manor	Founded as secondary colony settlement of Bickenhill but still associated with the main manor. The homesteads were situated in a linear arrangement along Middle Bickenhill Lane and the settlement has shrunk from its original extents. The significance of this asset lies in its associations with the manor(s) of Bickenhill and Hill Bickenhill and the evidence it can provide for the layout of medieval settlements and the distribution of land during this period. The archaeological evidence from this settlement provides information on the material culture of the settlement.	Medieval	Non-designated	N/A	Low	N/A	MSI10504
BICo33	CH-01-154, H8	Archaeology	Hollow way	Old road between Bickenhill and Meriden, south of Cottage Farm, Hampton in Arden. The significance of this asset lies in its historical and evidential value and the information it provides of early transport routes across the study area and early links between the settlements of the area. It can also provide historical evidence for the development and growth of the settlements in the study area.	Medieval	Non-designated	N/A	Low	N/A	MSI5727

BICo34	CH-01-154, F8	Archaeology	Medieval fields	Feature identified through aerial photography interpretation. Eroded ridge and furrow, deserted medieval village visible and water meadows and possible earthworks extant in 1946 but not visible on current photographs. Possible moated structure and two sub-circular features (possibly ponds or quarry pits), visible in 2001. Eastern part will be removed by the Park Farm Quarry at Middle Bickenhill. Significance lies in its archaeological and evidential value and the information the asset provides on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Moderate	N/A	N/A
BICo35	CH-01-154, H8	Archaeology	Farmhouse	Cottage Farm, early 19th century brick farmstead, Birmingham Road, Hampton in Arden. Now demolished. Significance lies in the historic and evidential value of the asset. It can provide evidence of construction techniques and trends for farmhouse buildings of this period and provide material evidence of the people who occupied this space. The material evidence provides further information on social status, diet and cultural trends of rural farmhouse dwellings.	Post-medieval	Non-designated	N/A	Low	N/A	MSI5763
BICo36	CH-01-154, H9	Archaeology	Ridge and furrow	West of Cottage Farm, Hampton in Arden. Significance lies in its archaeological and evidential value and the information the asset provides on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	MSI5726
BICo37	CH-01-154, F6	Settlement	Deserted settlement	Hill Bickenhill, now represented by Park Farm, ceased to exist as separate entity around 1785. Significance lies in its historic and archaeological value in the evidence it provides of a medieval settlement, including types of buildings, material evidence and agricultural regimes. The asset could also provide evidence on the social status of the occupants of this settlement and any connections with other settlements in the area.	Early medieval to Post-medieval	Non-designated	N/A	Low	N/A	MSI10503
BICo38	CH-01-154-L1, G3	Archaeology	Medieval fields	Feature identified through aerial photography interpretation. Eroded ridge and furrow. Significance lies in its archaeological and evidential value and the information the asset provides on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BICo39	CH-01-154-L1, G2 CH-01-154, H10	Archaeology	Road	Earlier road line from Church Bickenhill to Stonebridge and Meriden, Bickenhill. The significance of this asset lies in the evidence it provides of the early road network in the area and provides information on the evolution of the transport network. It could also provide archaeological evidence for any possible earlier roads which may have been superseded by the construction of this later version.	Medieval	Non-designated	N/A	Low	N/A	MSI10828

BICo40	CH-01-154, F8	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of his asset lies in its archaeological value and the provision of evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BICo41	CH-01-154, F8	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of his asset lies in its archaeological value and the provision of evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BICo42	CH-01-154, G9	Archaeology	Site of Mary Hastings Cottage	Site of Mary Hastings Cottage, Middle Bickenhill, recorded on 1839 Tithe Award, later known as Oak Tree Cottage. Now demolished. Significance lies in the historic and evidential value of the asset. It can provide evidence of construction techniques and trends for cottage buildings of this period and provide material evidence of the people who occupied this space. The material evidence can provide further information on social status and diet of people in the post-medieval period.	Post-medieval	Non-designated	N/A	Low	N/A	MSI10508
BICo43	CH-01-154, G8	Built heritage	Meadow Cottage	Sixteenth or 17 <sup>th</sup> century timber-framed cottage in-filled with brick, Middle Bickenhill Lane, Bickenhill. The building has now been demolished. Its significance lies in in the historic and evidential value of the asset.	Medieval to Post-medieval	Non-designated	N/A	Low	N/A	MSI10537
BICo44	CH-01-154-L1, H3	Built heritage	Barn	Small building, possibly a barn near the M42, Bickenhill. There is no evidence of the barn at the location given or the immediate area suggesting that it has been demolished.	Post-medieval	Non-designated	N/A	Low	N/A	MSI5762
BICo45	CH-01-154, F2	Archaeology	Medieval fields, boundaries, pits	Feature identified through aerial photography interpretation. Eroded ridge and furrow, and possible headland. Possible field boundaries and pits. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval to Post-medieval	Non-designated	N/A	Low	N/A	N/A
BICo46	CH-01-154, F6	Archaeology	Medieval fields	Feature identified through aerial photography interpretation. Eroded field boundaries and ridge and furrow in the area of Park Farm. The asset will be removed by Park Farm Quarry at Middle Bickenhill currently in operation. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BICo47	CH-01-154, F3	Archaeology	Enclosure, Bank	Earthwork boundary bank surrounded medieval village of Little Packington, 100m east of St. Bartholomew's Church. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period	Medieval	Non-designated	N/A	Low	N/A	MWA4932

BICo48	CH-01-154, E8	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of this asset lies in its archaeological value and the potential to provide evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BICo49	CH-01-154-L1, H3	Archaeology	Ridge and furrow	Roughly north-south earthwork under pasture, east-north-east of Bickenhill village. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	MSI8588
BICo50	CH-01-154, F3 CH-02-152, C3 CH-02-153, G4	Built heritage	Church of St Bartholomew	Church with surviving 12th century nave, but much altered and restored in the 19th century. Coursed sandstone rubble with plain-tiled gable roof with end parapets on kneelers and gable crosses. The church lies in an isolated position away from the main settlement, alongside the grade II listed Rectory.	Medieval to Post-medieval	Listed building	II	Moderate	1320003	N/A
BICo51	CH-02-153, H9	Built heritage	Bickenhill Conservation Area	The area is situated to the south of Birmingham Airport, but despite this proximity, the village retains its rural character with continued emphasis on its agricultural setting. The built environment is characterised by substantial detached properties, arranged within large gardens. The position of the buildings set back from the street enhances the rural appearance of the village with large expanses of green space. The buildings themselves represent an eclectic mix of architectural styles and plan form. The majority date from the Georgian and Victorian periods, including a number of farmhouses located on the edge of the settlement. Beyond the conservation area the landscape continues as open agricultural fields before encountering the M42 to the east and Birmingham Airport to the north.	Early medieval to Post-medieval	Conservation area	N/A	Moderate	N/A	N/A
BICo52	CH-01-154, E6	Archaeology	Boundaries and possible quarry or marl pit	Feature identified through aerial photography interpretation. Eroded former boundaries and area of possible quarrying. Will be removed by new mineral extraction site currently being worked. Significance lies in its archaeological and evidential value and the information the asset provides on agricultural and industrial regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the narrative of the evolution of quarrying in this area.	Post-medieval	Non-designated	N/A	Low	N/A	N/A
BICo53	CH-01-154, F5 CH-02-152, C4 CH-02-153, G5	Built heritage	Park Farmhouse	Late 18th century farmhouse constructed from red brick and arranged over two storeys plus attic on a traditional 'U' plan. The house lies within established gardens, to the north of the main farm complex with open agricultural land extending to the south and west. Directly to the south of the house is a collection of 19th century barns, arranged around a courtyard, now converted to commercial use. These enhance the group value of the main house.	Post-medieval	Listed building	II*	High	1367098	N/A
BICo54	CH-02-152, C8 CH-02-153, H9	Built heritage	Grange Farmhouse	Nineteenth century farmhouse, altered, exterior, perhaps with earlier structure. Colour washed stucco, tiled roof with three gables. The building is set back from the street within a large piece of land. It forms an interesting group with its outbuildings to the west.	Post-medieval	Listed building	II	Moderate	1075949	N/A

BICo55	CH-01-154, F8	Archaeology	Road, ford	Old road from Hampton to Coleshill which crossed Holywell Brook by the Westaneford, north of Middle Bickenhill. The significance of this asset lies in the evidence it provides of the early road network in the area and provides information on the evolution of the transport network. It can also provide archaeological evidence for any possible earlier roads which may have been superseded by the construction of this later version.	Early-medieval to Post-medieval	Non-designated	N/A	Low	N/A	MSI10829
BICo56	CH-01-154, E3 CH-02-152, C3 CH-02-153, G4	Built heritage	The Rectory	Early 19th century rectory of red brick, plain-tiled roof hipped, with end stacks to rear wing, but retaining 18th century fabric. Two storeys with band between the storeys, five-bay front elevation of 12-pane recessed hung sashes. The Rectory lies outside the village and is set within mature gardens. The interest of the building lies in its good retention of historic features and its association with the Church of St Bartholomew.	Post-medieval	Listed building	II	Moderate	1034815	N/A
BICo57	CH-02-152, C8 CH-02-153, H9	Built heritage	Church of St Peter	Church with 12th century north aisle. Chancel added c. 1300, with late 15th century north chapel and embattled west tower much restored 1887. The 17th century spire rises above the village skyline, giving the church is prominence which extends beyond Bickenhill. The isolation of the church is reinforced by the absence of any intervisibility with other church structures within the wider landscape.	Medieval	Listed building	I	High	1343224	N/A
BICo58	CH-02-152, C2 CH-02-153, F3	Built heritage	Little Packington Bridge	Built 17th century, majority lost in a flood in 1900, later re-built. The bridge lies within the wider parkland of the Packington Estate which defines its setting. The significance and setting of the asset will not be impacted.	Post-medieval	Scheduled monument and Listed building	II	High	1005752/ 1320040	N/A
BICo59	CH-02-152, C2 CH-02-153, F3	Built heritage	Beam Ends	Mid-17th century farmhouse, timber framed with rendered infill and thatched roof. Beam ends retains its rural setting despite quarrying activities to the west.	Post-medieval	Listed building	II	Moderate	1365125	N/A
BICo60	CH-01-154, E4	Archaeology	Site of former quarry	Site of quarry, south-east of Denbigh Corner south-east of Denbigh Corner, 600m north-west of St. Bartholomew's Church, Little Packington. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it can provide for quarrying techniques.	Post-medieval	Non-designated	N/A	Low	N/A	MWA6121
BICo61	CH-01-154, E6	Archaeology	Road, toll gate	Imperial Road, a turnpike road, situated east of Bickenhill Common Farm, Great Packington. The significance of this asset lies in the evidence it provides of the early road network in the area and provides information on the evolution of the transport network. It can also provide archaeological evidence for any possible earlier roads which may have been superseded by the construction of this later version.	Post-medieval	Non-designated	N/A	Low	N/A	MWA4782
BICo62	CH-01-154, E9	Archaeology	Farmhouse, Rabbit warren	Site of earthworks, possible east-west rectangular pillow mound, south-east of Warren Farm, Bickenhill. Significance lies in the archaeological and evidential value of the asset and the knowledge it provides of agricultural regimes during the post-medieval period.	Post-medieval	Non-designated	N/A	Low	N/A	MSI5668

BICo63	CH-02-152, B2 CH-02-153, F3	Woodland	Todds Rough	Ancient and semi-natural woodland. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and the quarrying a reinstatement of land in the 20th century, including the creation of the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Medieval to Post-medieval	Ancient woodland	N/A	High	N/A	N/A
BICo64	CH-01-154, D7	Archaeology	Boundary bank	Field bank south-west of Bickenhill Common Farm, Bickenhill. Significance lies in the archaeological and evidential value of the asset and the knowledge it can provide for land division and utilisation of the landscape.	Neolithic to Post-medieval	Non-designated	N/A	Low	N/A	MSI5728
BICo65	CH-01-154-L1, E1	Archaeology	Farmhouse	Site of Pendigo Farm, Bickenhill, now site of NEC. Significance lies in the historic and evidential value of the asset. It can provide evidence of construction techniques and trends for farmhouse buildings of this period and provide material evidence of the people who occupied this space. The material evidence can provide further information on social status, diet and cultural trends of rural farmhouse dwellings.	Post-medieval	Non-designated	N/A	Low	N/A	MSI10535
BICo66	CH-02-152, B2 CH-02-153, E4	Woodland	Birch Wood	Ancient and semi-natural woodland. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and subsequent quarrying. The land has since been reinstated as the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Medieval to Post-medieval	Ancient woodland	N/A	High	N/A	N/A
BICo67	CH-01-154-L1, E6	Archaeology	Site of Hurdle Hall Farm	Hurdle Hall Farm, Bickenhill. Demolished as part of Birmingham Airport. Significance lies in its historic and archaeological value in providing evidence for agriculture activity during the post-medieval period.	Post-medieval	Non-designated	N/A	Low	N/A	MSI10510
BICo68	CH-02-153, E2	Built heritage	Fishers Hall Farmhouse	Late 16th century and 19th century, timber-framed, part brick cased and part rendered, plain-tiled roof with red brick ridge stack to south side of ridge, original lobby-entry plan facing the yard. The farmhouse lies within the larger Packington Estate and retains its agricultural setting, cut in the 19th century by the Stonebridge Railway.	Post-medieval	Listed building	II	Moderate	1034816	N/A
BICo69	CH-01-154, C7	Archaeology	Boundary ditch	Possible field boundary, Bickenhill, identified during field survey as part of assessment for M42 widening scheme. Significance lies in its historic and archaeological value in providing evidence for agriculture activity during the post-medieval period. Also can provide evidence for differing agricultural regimes and land division.	Neolithic to Post-medieval	Non-designated	N/A	Low	N/A	MSI5669

BICo70	CH-01-154, C6	Built heritage	Bickenhill Common Farm	Bickenhill Common Farm, late 18th brick farm building. The farmhouse is a later 19th century addition. Surrounding the historic structures are modern outbuildings. The complex remains as evidence of 18th century agricultural activity within the area, retaining open fields to the west, between the farm and the M42.	Post-medieval	Non-designated	N/A	Low	N/A	MSI5764
BICo71	CH-01-154-L1, D3	Archaeology	Sub-circular feature	Feature identified through aerial photography interpretation. Possible small quarry or round barrow, now destroyed. Significance is limited to the historic value and the possible evidence it can provide of former land use and human activity in this area.	Unknown	Non-designated	N/A	Low	N/A	N/A
BICo72	CH-01-154-L1, E6	Built heritage	Windmill	Windmill, east of Hurdle Farm. The site was redeveloped as part of Birmingham Airport. Significance is limited to the historic value and the possible evidence it can provide of former land use and human activity in this area.	Medieval	Non-designated	N/A	Low	N/A	MSI3118
BICo73	CH-02-152, B1 CH-02-153, E3	Woodland	Bannerley Rough	Ancient and semi-natural woodland. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and subsequent quarrying. The land has since been reinstated as the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Medieval to Post-medieval	Ancient woodland	N/A	High	N/A	N/A
BICo74	CH-01-155a, G1	Archaeology	Possible quarry or marl pit	Feature identified through aerial photography interpretation. Eroded probable former quarry or marl pit. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it can provide for quarrying techniques.	Post-medieval	Non-designated	N/A	Low	N/A	N/A
BICo75	CH-01-154, B8 CH-01-155a, J8	Archaeology	Ridge and furrow	Located south of Blackfirs Lane, Bickenhill. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	MSI5805
BICo76	CH-01-154, A5 CH-01-155a, H6	Archaeology	Boundary or drainage features in Pool Wood	Linear features identified through LiDAR. Probably a post-medieval or modern drainage. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A

BICo77	CH-01-154-L1, D6	Settlement	Manor	Wavers Marston, manor from 12th century, Merstone split into two manors in this period, to distinguish between each they adopted surname of its lord, thus becoming Wavers Marston and Marston Culy.	Medieval	Non-designated	N/A	Low	N/A	MSI10495
BICo78	CH-01-155a, H7	Archaeology	Furrows within Pool Wood	Furrows, possibly relating to plantation, recorded within woodland by LiDAR. Significance lies in its historic and archaeological value in the evidence it can provide for tree management regimes and land utilisation.	Unknown	Non-designated	N/A	Low	N/A	N/A
BICo79	CH-01-154, B9 CH-01-155a, I10	Archaeology	Common land	Bickenhill Heath, Bickenhill, extensive area (about 162 hectares) used for agricultural purposes, divided under the Enclosures Act in 17th century. Significance lies in the historic value and the evidence the asset provides for the utilisation and division of land and the difference in agricultural regimes on common lands.	Medieval	Non-designated	N/A	Low	N/A	MSI10505
BICo80	CH-01-154, A7 CH-01-155a, I8	Archaeology	Farmhouse	Site of Firfield Farm, Bickenhill, now redeveloped. Significance lies in the historic and evidential value of the asset. It can provide evidence of construction techniques and trends for farmhouse buildings of this period and can provide material evidence of the people who occupied this space. The material evidence can provide further information on social status, diet and cultural trends of rural farmhouse dwellings.	Post-medieval	Non-designated	N/A	Low	N/A	MSI5765
BICo81	CH-01-154-L1, C5 CH-02-152, A7 CH-02-153, F9	Built heritage	Gatepiers at Marston Hall	Site of 17th century or 18th century red brick gatepiers, formerly with stone ball finials - now demolished. The site has been redeveloped as part of Birmingham Airport removing its significance.	Post-medieval	Listed building	II	Not significant	1054790	N/A
BICo82	CH-01-154-L1, C5 CH-02-152, A7 CH-02-153, F9	Built heritage	Marston Hall	Site of early 16th century, altered 17th century, bed brick refaced in stucco, tiled roof with three gables two storeys and attics - now demolished. The site has been redeveloped as part of Birmingham Airport removing its significance.	Post-medieval	Listed building	II*	Not significant	1075948	N/A
BICo83	CH-01-155a, G2	Archaeology	Marl pit	Site of marl pit 300m east of the bogs, Coleshill, marl extracted for use as fertiliser. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it provides for quarrying techniques.	Post-medieval	Non-designated	N/A	Low	N/A	MWA6588
BICo84	CH-01-155a, G5	Archaeology	Gravel pit	Site of gravel pit north-west of Coleshill Pool, 500m north-east of Brickfield Farm, Coleshill. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it can provide for quarrying techniques.	Post-medieval	Non-designated	N/A	Low	N/A	MWA5538
BICo85	CH-01-155a, F6	Archaeology	Brick kilns	Site of several brick kilns situated 300m north-east of Brickfield Farm, Coleshill. Significance lies in the historic and archaeological value and the evidence it can provide for brick making technology and evolution of methods if the site was in use for a number of years. It can also provide additional information to the historical narrative and story of the early industry of the study area.	Post-medieval to 20th century	Non-designated	N/A	Low	N/A	MWA293
BICo86	CH-01-155a, G9	Archaeology	Site of Coleshill Heath Farm	Farmstead shown on historic mapping from 19th century. The building has been demolished.	Post-medieval	Non-designated	N/A	Low	N/A	N/A

BICo87	CH-01-155a, G7	Archaeology	Brickfield Farm	Former farmstead, west of former brickworks, depicted on historic mapping from at least 1888 to the 1980s. Building now in derelict state, with site occupied by telecommunication masts. Significance lies in the historic and evidential value of the asset. It can provide evidence of construction techniques and trends for farmhouse buildings of this period and provide material evidence of the people who occupied this space. The material evidence can provide further information on social status, diet and cultural trends of rural farmhouse dwellings.	Post-medieval	Non-designated	N/A	Low	N/A	N/A
BICo88	CH-02-153, E8 CH-02-152, A7	Woodland	School Rough	Ancient and semi-natural woodland. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and subsequent quarrying. The land has since been reinstated as the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Medieval to Post-medieval	Ancient woodland	N/A	High	N/A	N/A
BICo89	CH-01-155a, F7	Historic hedgerow	Hedgerow	Hedgerow located on boundary between the parishes of Chelmsley Wood and Bickenhill. Significance of this asset lies in its evidential and historic value. The line and archaeological associations of important hedgerows provide information on historic field systems and can provide information on the division and utilisation of land from the early medieval to the post-medieval. They also have aesthetic and historic value in the preservation of historic landscapes and the value they add to the legibility and ability to understand the evolution of the landscape.	Unknown	Important hedgerow (historic criteria)	N/A	Moderate	N/A	N/A
BICo90	CH-02-153, D9	Built heritage	5, Elmdon Road	Timber-framed 16th century house with evidence of 17th and 19th century remodelling, including rough-cast plasterwork. The building lies within the suburbs of Marston Green Area, flanked by 19th and 20th century residential buildings; however, it has retained its historic position fronting the former village green.	Post-medieval	Listed building	II	Moderate	1261866	N/A
BICo91	CH-01-155a, C10 and D10	Woodland	Site of Chelmsley Wood	Site of woodland, as marked on historic mapping from at least the 18th century, possible former boundary, area now developed. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and subsequent quarrying. The land has since been reinstated as the creation of the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Post-medieval	Non-designated	N/A	Low	N/A	N/A
BICo92	CH-02-153, C8	Built heritage	Alcott Hall	18th century, red brick, tiled roof with corbelled brick cornice, two storeys and attics. The building is currently vacant and boarded, but represents a good example of Georgian vernacular.	Post-medieval	Listed building	II	Moderate	1055808	N/A

BIC093	CH-02-153, C9	Woodland	Alcott Wood	Ancient and semi-natural woodland. The setting of this asset is the surrounding rural landscape, however the setting adds little to the significance of the asset. The setting has been eroded by the increase in agricultural land required in the 18th and 19th centuries and subsequent quarrying. The land has since been reinstated as the Stonebridge Golf Course. The significance of the asset lies in its historic and evidential value. The woodlands provide evidence of the former landscape of this area which was once dominated by the Forest of Arden. It also has historical value with the links with the Forest of Arden and could potentially contain evidence of early woodland activities such as charcoal making or small scale quarrying.	Medieval to Post-medieval	Ancient woodland	N/A	High	N/A	N/A
BIC094	CH-02-153, C6	Built heritage	Bacon's End Bridge	18th century bridge widened on west in 1925 and 1970 as part of the A452 Chester Road. Three stone arches, one slightly pointed probably late medieval and two round arches. The bridge retains its significance as a crossing point; however, the changes to the road have significantly degraded its setting.	Medieval to 20th century	Listed building	II	Moderate	1076760	N/A
BIC095	CH -01-154, H3	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, east of The Mill Farm. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BIC096	CH -01-154 H2	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, east of Mill Shrubbery. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BIC097	CH -01-154 J2	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, Geary's Heath. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A

Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A

BIC099	CH -01-154, H3	Archaeology	Earthwork/ boundaries	Feature identified through LiDAR analysis, south-west of Hall Pool. Significance lies in its historic and archaeological value in providing evidence for agriculture activity during the post-medieval period. Also can provide evidence for differing agricultural regimes and land division.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC100	CH -01-154, H3	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, west of The Mill Farm. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BIC101	CH -01-154, E8	Archaeology	Former channel	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. Significance lies in the archaeological evidence of possible early water management or drainage systems in the study area. It can also provide evidence for agricultural regimes in the study area.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC102	CH -01-154, J4	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, West of Geary's Heath, east of A452 Chester Road. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BIC103	CH -01-154, I4	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, west of Geary's Heath, east of A452 Chester Road. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BIC104	CH -01-154, G4	Archaeology	Circular feature	Feature identified through LiDAR analysis, south of intersection of A452 Chester Road and former Stonebridge Railway embankment. The unknown function of this asset means that significance is difficult to assess, however it is evidence of human activity in the study area which may be associated with other contemporary features.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC105	CH-01-154, G6	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, north of A45 Coventry Road, east of former Stonebridge Railway embankment. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A

BIC106	CH -01-154, H6	Archaeology	Clay pit	Feature identified through LiDAR analysis, east of former Stonebridge Railway embankment. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it can provide for quarrying techniques.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC107	CH -01-154, E6	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, north of the Olympia motorcycle park. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC108	CH -01-154, H6	Archaeology	Rectilinear feature - destroyed	Feature identified through LiDAR analysis, south of A45 Coventry Road. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC109	CH -01-154, G6	Archaeology	Possible clay pit	Feature identified through LiDAR analysis, east of Middle Bickenhill, west of former railway embankment. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it can provide for quarrying techniques.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC110	CH -01-154, F7	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, east of Middle Bickenhill Lane. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC111	CH -01-154, G6	Archaeology	Clay pit	Feature identified through LiDAR analysis, between Middle Bickenhill Lane and former railway embankment. Significance lies in the historical value as evidence of the exploitation of the mineral resources of this landscape throughout the post-medieval period. Also has archaeological value in the evidence it can provide for quarrying techniques.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC112	CH -01-154, F7	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, east of Middle Bickenhill Lane. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A

BIC113	CH -01-154, E7	Archaeology	Former channel	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. Significance lies in the archaeological evidence of possible early water management or drainage systems in the study area. It can also provide evidence for agricultural regimes in the study area.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC114	CH -01-154, E7	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of his asset lies in its archaeological value and the potential to provide evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC115	CH -01-154, 7B CH-01-155a, J7	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, south of B4438 Bickenhill Parkway, west of M42. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Medieval	Non-designated	N/A	Low	N/A	N/A
BIC116	CH-01-154, E7	Archaeology	Former channel	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. Significance lies in the archaeological evidence of possible early water management or drainage systems in the study area. It can also provide evidence for agricultural regimes in the study area.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC117	CH- 01-154, E7	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of his asset lies in its archaeological value and provision of evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC118	CH-01-154, D7	Archaeology	Linear feature	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. The significance of his asset lies in its archaeological value and provision of evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC119	CH-01-154 F8	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, east of Middle Bickenhill Lane. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC120	CH-01-154, F8	Archaeology	Ridge and furrow	Feature identified through LiDAR analysis, west of Middle Bickenhill Lane. Significance lies in its archaeological and evidential value and the information the asset can provide on agricultural regimes of medieval and post-medieval society and the utilisation and division of the landscape during this period. There is also historic value in the knowledge of the asset as it contributes to the historic narrative and demonstrates occupation and use of this area during the medieval and post-medieval period.	Unknown	Non-designated	N/A	Low	N/A	N/A

BIC121	CH-01-154,F8	Archaeology	Linear feature/ ditch	Feature identified through LiDAR analysis, west of the Olympia motorcycle park. The significance of his asset lies in its archaeological value and the provision of evidence relating to the use and division of land.	Unknown	Non-designated	N/A	Low	N/A	N/A
BIC122	CH-01-154,F8	Archaeology	Road, ford	Feature identified through LiDAR analysis, old road from Hampton to Coleshill, west of Middle Bickenhill Lane. The feature is not associated with an existing road, but lies within an area of open land adjacent to the Hollywell Brook.	Early medieval to Post-medieval	Non-designated	N/A	Low	N/A	N/A
